CARBON, ALBERTA, THURSDAY, SEPTEMBER 24, 1931

\$2.00 A YEAR IN ADVANCE

CHURCH SERVICE HOUR CHANGED

Commencing next Sunday, September 27th, there will be a change in the hour of service at the Carbon United Church. In future service will be held in the morning at 11 a.m. In the afternoon the minister, Rev. McNichol, will hold services at Belseker, and every Sunday evening service will be held at Irricana at 7:30 p.m. The first Sunday afternoon in each month has been reserved for service at the Peerless Mine, Carbon, and on this Sunday there will be no service at Belseker.

It has been found necessary to make the change of services in the Carbon field and to add Belseker and Irricana to this field in order to carry on the work these trying times.

There will also be a change in the Sunday School hour in Carbon and in future the Sunday School will be held immediately after the morning service.

It is to be hoped that this change of service will be more advantageous to the Carbon people and that larger attendances will be the result.

LETTERS TO THE EDITOR

The Editor, Carbon Chronicle
Dear Sir:

There is so much talk nowadays about our modern girls that I thought I would ask you to insert the enclosed article in your valuable paper. It does seem that the girls of today have not changed very much from the girls of yesterday. In my opinion they are just as sweet and good as ever they were. We must allow that they are far more broad minded and more open than in the old days. Is that a fault? Most decidedly not. Then again do you not think we mothers are getting more broad-minded. I think so and I give quite a lot of credit to our daughters for that. Don't they come to you now-

adays and tell you lots of little things that you would never have thought of telling our old-fashioned mothers. There must also be a reason for that and probably it is that we not only treat them as our daughters but as pals as well. Don't be ever lasting bawling them out because they sat a little later out in the cars than you thought they should (your neighbors will do that for you). While I do not approve of our girls sitting out in the cars after midnight, if they are going to be naughty they can be just as naughty before ten as after that time. I do not think they are any worse morally for that, but it is not good for their health. So there you are, daughters. The modern mothers opinion of you. Just meet us half way and try to get a little more beauty sleep (not that you need the beauty stuff, for you can get lots of that in the drug stores.)

A SUBSCRIBER

MORTIMER-NEVILLE

A quiet wedding was solemnized at St. John's Church, Calgary, on Wednesday, September 9, when Constance Mary Neville, second daughter of Mrs. T. P. Neville, of Spaulding, Sask., and Mr. Lenton Mortimer, youngest son of the late Rev. Malcolm Mortimer, of Aberdeen Scotland, were united in marriage, the Rev. Mr. Attwood, of Calgary, officiating at the ceremony. The bride was becomingly attired in a charming ensemble of navy blue crepe with hat and accessories to match, and wore a corsage bouquet of sweet peas and maiden hair fern. She was given in marriage by her uncle, Mr. J.H. McClure, of Drumheller. Both bride and groom were unattended.

After the ceremony a delightful wedding breakfast was served in the Elizabethan room of the Hudson Bay, and later in the day Mr. and Mrs. Mortimer left by motor for a trip through the mountains. Upon their return, the young couple will reside in Drumheller. —Drumheller Mail.

ALBERTA NEWS

Amendment of the Highways Vehicles Act and the revision of regulations thereunder might result from investigations now being carried on by the Government, declared Premier J.E. Brownlee on Wednesday. The regulations might be revised prior to the next session and the act amended there at.

Evidence that the accused had not been asked whether he was destitute, or not, and that therefore no allegation of fraud existed, was brought out in the trial of John Kachmar, who was discharged on Wednesday. Kachmar was arrested on Monday, alleged to have obtained \$43.50 from the city of Calgary by working on relief. Police found that Kachmar had two bank accounts one containing \$90 and from the other he had drawn \$1000 with which to return to his native land.

The annual schools track meet of the town schools from Crossfield to Innisfail will be held at Innisfail on Friday, October 2nd.

A gentleman at one of our boarding houses, after having beans shoved at him each meal for two straight weeks, asked the waiter to please read the eighth verse of the thirteenth chapter of Hebrews. We imagine this will make some of our readers get the dust off their bibles.

The coal mines in the Drumheller district are getting under way, and although September business is below normal, many men are back at work, and different mines are running several days a week.

Country storekeepers are again beginning to be bothered by the annual harvest time influx of rough and ready store burglars, according to reports gleaned from the district by the Alberta Provincial Police. The robbers appear to be amateurs.

Wayne is in the midst of a dog poisoning epidemic, and no less than 40 dogs have died from the effects of eating things impregnated with deadly poison. Many of the victims were valuable hunting dogs, as well as household pets, and incensed citizens are co-operating with police in an effort to locate the party who is scattering poisoned bait, or get at the cause of the epidemic.

Four hundred girls waited in the lane behind the new S. S. Kresge store in Calgary at noon last Monday, in the hope of securing employment when the Kresge store opens in that city in three weeks time.

For the first time in several years the Ogden locomotive and car shops of the Canadian Pacific railway will be closed. Labor officials estimate that about \$50 men would be affected.

Robert Christie, aged seven, son of Mr. and Mrs. Charles Christie, west of Trochu, suffered the loss of one finger and the cutting of others on his left hand, as well as having his right arm cut through the bone, when he went to sleep in the wheat fields his father was cutting.

Red Deer Liberals will contest the coming by-election in that riding. It was decided at a meeting held in Red Deer recently. Choice of a nominee will be made at a conference, which will be called in the near future.

Drilling operations on the Cartier Oil well west of Olds, have been resumed after being closed down all summer.

Gleichen duck hunters report good luck on the opening day of the season.

Golf is a game in which the ball lies everywhere and the player always.

The parents of Mrs. Linbergh, who are now taking care of the baby, will soon be anxiously scanning the Western skies.—Calgary Albertan.

"GALLI!"

While we cannot vouch for the veracity of the following story, which was told in all sincerity that it really happened, and here it is:

A lone driver of a truck was proceeding south of the main highway recently between Mowers school and Didsbury, and when opposite a number of sheep which were grazing near the road, the driver halted for a second or two and then backed into the ditch that happened to be shallow at that point. This took place near a farm house and the owner of the farm on looking through the window of his home, noticed a stranger trying to round up the sheep and was experiencing some difficulty. The farmer man went out to ascertain the cause of the unusual scene, and as he walked up to the sheep-herder he was hailed thus: "I'm in a d— of a fix; these d— sheep I was taking to market, have jumped the truck," and asked the farmer to help him re-load. Not recognizing his own stock, the farmer proceeded to help the man in distress and the sheep were finally corralled safely into the truck, and with "thanks old chap" the truck driver soon disappeared. At night Mr. Farmer counted his sheep, his flock being the seven head short he had so kindly helped the man with unlimited gall to get away with so smoothly.—Olds Gazette

10th Government Crop Report

Cutting of all grains is completed in that part of the province lying south and south-east of Calgary. 75 per cent of the threshing has been done in this area, but progress has been delayed during the past ten days by rain which at some points amounted to two inches of precipitation. All cutting is done in the Peace River district, but threshing has been delayed by showery weather. In the central and northern areas about 75 per cent of the crop is cut, but very little threshing done.

Harvest and threshing operations are seriously delayed by continued rains and a period of dry weather is needed to complete the handling of all crops. A large part of the wheat in the south grades No. 1 Northern. In the Peace River district shrunken kernels tend to lower the grade of wheat, which in other respects is of excellent quality. In central and north-central Alberta excessive moisture is causing a considerable part of the wheat to grade tough. Yields may be said to be quite satisfactory in all parts of the province with the exception of the south-eastern area.

Pastures, fodder and root crops outside of the drought area are in excellent condition. Recent rains in the south have been particularly beneficial. Alfalfa has made unusually heavy growth and in some instances a third crop has been cut on irrigated lands. Sugar beets give indications of an average yield. The first severe frost occurred in central and northern Alberta on the night of September 16th. Some damage was done to standing crops and vegetables but owing to the late date this will not be serious.

THE SPIRIT OF CANADA

"The obligation of keeping together this Empire does not rest alone with

HARVESTING DE- LAYED BY RAIN

While most of the grain in the Carbon district has been cut, there has been little threshing done around here so far this season and during the past week there has been rain almost every day and the grain is damp. The weather has been cold and raw, and snow was reported in some parts of Alberta. The past couple of days, however, have been a little warmer and the winds have dried out the grain. Should the present weather continue threshing will be general by the first of the week.

There are some fair crops in the district and some poor ones, but the quality of wheat is expected to run high. The recent frosts did little damage to wheat, although the cold spell the past week has caused some uncut fields of wheat to be very late and this will probably be cut for feed if frost is prevalent during the next week.

The prospects are that there will be an abundance of feed in the district this season.

the Mother Country," declared Hon. R. L. Maitland, K.C. at Vancouver recently.

"We must not think only in terms of your own city, country, province, Dominion, but as part of the Empire of Nations that will keep the ideals and ideas that we live for."

Nor were to think of Canada in terms of dollars and cents alone. Mr. Maitland continued, if she was to live up to what is expected of her. Develop Canada agriculturally? Commercially? —Why, certainly! but also develop Canada spiritually, he urged.

To shape the national character of Canada is part of our responsibility in this generation. One of our weaknesses, Mr. Maitland thought, is modesty of the Canadian people about their accomplishments. It would be better if we develop a little appreciation of our own people and our own things.

Our greatest responsibility was that of teaching eagerly and conscientiously the kind of immigrant we allow to build in with British stock — people whose ideals and ways are ours. The man who comes from a foreign land, not liking our Constitution, the foundation upon which this country rests, the things we are striving for—the sooner such a man is put back on a boat and shipped back to where he came from, the better, Mr. Maitland asserted.

Tell our boys and girls the story of the places by the Atlantic, the two tongues that come under one flag in old Quebec, urged Mr. Maitland. Let them know more of old Ontario, the mother of provinces, and the courageous men, some of the soil, who laid the foundations of culture and education for Canada. Then the sagebrush land, the plains developed into acres of shining wheat, the rugged men who chiselled a trail across the Rocky Mountains and down into British Columbia and the smiling shores of the Pacific. Could anything be more inspiring to the young man standing on the shores of life than to know it is his privilege to help work out the destiny of a great country like this.

Guard against children leaving by installing in their minds a love of Canada, concluded Mr. Maitland.

Who Does Your Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

The World's Grain Show

"Canada, 1930," a booklet published by the Dominion Bureau of Statistics at Ottawa, summarizes the value of production in Canada for 1927 as follows: Agriculture, 38.1 per cent.; forestry, 8; fisheries, 1.3; trapping, 0.4; mining, 6.3; electric power, 2.7; construction, 8.2; custom and repair, 1.9; manufactures, 33.1 per cent.

These figures are significant. They show conclusively the paramount importance of the industry of agriculture.

This importance is accentuated by the fact that the conditions of manufacturing, which occupies second place, reflect almost immediately the conditions of agriculture. It is accentuated even to a greater degree when one comes to examine the manufacturing schedule of the same booklet. Among the twenty-five leading manufacturing industries of Canada, flour and grist mill products occupy second place; slaughtering and meat packing third; butter and cheese seventh; bread and bakery products fourteenth.

A glance at the exports schedules discloses the further fact that wheat stands at the top of the list and wheat flour second.

It seems to be needless, therefore, to make an apology for stating that any activity which promises even a surer footing for Canada's greatest industry merits the attention and support of every Canadian.

Will the World's Grain Exhibition and Conference to take place at Regina next year bear scrutiny from this point of view? Let us see.

In the first place, it is as its name implies, an exhibition and a conference. Secondly, it is open for participation to all the world.

The exhibition may be conveniently divided into three parts—the competitive, the national, and the commercial exhibits.

The competitive exhibits consist of 19 kinds of field crop products, divided into 56 classes, embracing practically all kinds of grain and seed grown in the world. The total of cash prizes amounts to over \$200,000 and the individual prizes are greater than have been offered ever before, anywhere in the world, at any other exhibition of its kind.

The winning of these prizes, however, is not the real objective of the competitive exhibition. The stimulant for a better quality field product is infinitely more important. Its effect is already apparent. There is ample evidence of this. The demand for registered—better quality—seed in greater all over Canada than it has ever had. One organization reports an increase of almost 100 per cent.

The national and commercial exhibits will tax the floor space of the immense new building to the utmost. Twenty-seven countries have already spoken for space and others will follow—50 are expected. A visit to these exhibits, occupying a frontage of over a mile and a half, will be an educational feature surpassed only by a trip around the world—a trip, by the way, which most of us are unable to enjoy.

The privilege to participate, either as a competitor in any or all the prize classes, as an exhibitor in the national or the commercial section, or as a mere visitor, is open, wide open to the great wide world.

Conferences of technical and practical agriculturists from many countries will take place during every day from July 25 to August 6. The programme will provide for the discussion of every conceivable subject having to do with all phases of field crop production, from the preparation of the soil to the disposal of the product for food, fodder, shelter or clothing.

Then there are the competitions for juniors, the tours of Canada, and a dozen other features, a mere reference to which space will not permit.

This whole programme, although not complete at this time, already contains the names of over a score of the "world's best." Surely such a co-operation of brains as this will constitute an asset to agriculture the value of which no man has the temerity to estimate.

Even from a monetary point of view alone, if the final effect be to raise the value of Canada's agricultural asset of almost 2,000 millions of dollars to the extent of one hundredth of one per cent. annually, the money necessary to carry the project to success will be an exceedingly profitable business investment.

But the World's Grain Exhibition and Conference will do more than this. It will effectively advertise Canada to the rest of the world, will give her an opportunity to take stock and ascertain her standing in field crop production, will stimulate her growers in the use of better seed, will clear away any false impressions in the minds of foreign buyers, will demonstrate to her growers the kind of competition that must be met in the markets of the world, will bring to our own country valuable ideas and experiences, and, most important of all, it will take its place among the great events which have brought the nations of the world into closer communion and a little further along the bumpy and tortuous trail toward the fertile meadows of international peace.

Saskatchewan Dairy Industry

Saskatchewan's dairy industry is expanding. The creamery butter production during July amounted to 2,805,316 pounds, an increase of 337,000 pounds over the output of July last year. The production for the first seven months of the year came to 11,437,871 pounds or 3,048,971 pounds more than for the similar period of 1930—a gain of 36.3 per cent.

Seventeen kinds of palms grow naturally in the United States.

Famous Jewel For Museum

The famous Canning jewel, which the Earl of Harewood sold at Sotheby's last June for \$50,000, has been presented to the Victoria and Albert Museum by "An American Friend" who desired to remain anonymous. The jewel dates from the 16th century and is traditionally supposed to have been sent by the Grand Duke of Tuscany to one of the Mogul Emperors.

Glasgow, Scotland, is to have air mail collection boxes.

Suffered Severe, Painful Cramps In Her Stomach

Those terrible cramps in the stomach that double you up in pain and make you break out in a cold perspiration, may be stopped by a few doses of Dr. Fowler's Extract of Wild Strawberry.

Mrs. Lloyd Jones, 204 Argyle St., Halifax, N.S., writes:—"I have suffered greatly from severe and painful cramps in my stomach. I tried several remedies without result. One day a friend advised me to take Dr. Fowler's Extract of Wild Strawberry, so I bought a bottle and got instant relief."

Cut In British Dole

Variety Of Unemployed Men and Women Are Affected

The 10 per cent. cut in unemployment insurance benefits in Britain, commonly called the dole, will affect a variety of unemployed men and women alike, from the age of 16 to 65. At the same time those in employment are called upon to increase their weekly payments to the "dole fund" and employers' contributions are likewise increased, under the provisions of the national economy bill.

Hitherto youths of 18 have been entitled to \$2.50 a week, rising to \$4.25, according to age. The \$4.25 is the maximum for single men.

Unemployed girls from the age of 16 are entitled to \$1.25 a week, with a rising scale for intervening ages to 21, when the allowance is \$3.75.

Additional benefits for dependents and children will not be affected by the reductions.

SAVED IMPORTED DRESS

"After a little wearing, a lovely green voile—an imported dress—lost colour so completely that it was not wearable. A friend who had admired it asked me why I wasn't wearing it any more. On hearing the reason she advised dyeing it and recommended Diamond Dyes. To make a long story short, it turned out beautifully. I have a lovely new dress that really cost just 15c—the price of one package of Diamond Dyes."

"I have since used Diamond Dyes for both tinting and dyeing. They do either equally well. I am not an expert dyer but I never have a failure with Diamond Dyes. They seem to be made so they always go on smoothly and evenly. They never spot, streak or run; and friends, never know the things I dye with Diamond Dyes are redyed at all!"

Mrs. R.F., Quebec.

Will Publish In Canada

Six American Magazines Will Now Be Printed Here

Publication of six magazines in Canada has been announced by McFadden Publications, and readers of the publications, numbering 200,000 in the Dominion, will obtain them at the same price as prevails today. The company has obtained a Dominion charter.

A statement issued by the publishers says, in part: "By so doing, we not only feel that we can do our part in the promotion of the printing industry in Canada, but we also propose to promote our publications with the newspaper advertising with the knowledge we are building on a staple foundation."

The company has contracted for an advertising campaign covering every part of the Dominion.

Don't Submit To Asthma. If you suffer without hope of breaking the chains which bind you do not put off another day the purchase of Dr. J. D. Kellogg's Remedy. A trial will drive away all doubt as to its efficiency. The sure relief that comes will convince you more than anything that can be written. When help is so sure, why suffer? This matchless remedy is sold by dealers everywhere.

Asbestos is the only mineral that can be woven into fire-proof garments and molded into instruments impervious to flame.

Painless and perfect in their action. Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognizable in a feverish restlessness, frequently ending in convulsions. A point of notable importance is that after Miller's Worm Powders have expelled the worms, the stomach and bowels are toned up into a very healthy condition.

Nevada excavations show that man was existent on the northern continent before the ice-age era.

Worms in children, if they be not attended to, cause convulsions, and often death. Mother Graves' Worm Exterminator will protect the children from these distressing afflictions.

Would Be Better

A pipeless organ has been invented which turns electricity into music. Many persons would probably be better pleased at the invention of a device to turn some radio music so called, into useful electricity.

Onions, potatoes, and tomatoes worth £10,000,000 were sent to England from Spain, France, and the Channel Islands last year.

Final Stage Of Depression

Winter Will Be Hard But Better Times Are To Follow

"The coming winter is expected to be the final stage of the three years of depression through which Canada has been passing." These words, taken from a speech which E. W. Beatty, president of the Canadian Pacific Railway, made recently at Fredericton, N.B., will be accepted everywhere as reassuring. Mr. Beatty is in a position to speak on such matters as he has an inside knowledge of economic tendencies. There is no doubt that we are in for a hard winter, but if we can feel that it will mark the turn of the tide we can see it through with hope and confidence. The darkness is often deepest just before the dawn, and there are certainly, many reasons for believing that the coming year will see Canada and the rest of the world once more on the upgrade towards normal trade and business conditions. — Toronto Mail and Empire.

The invention of a wind measuring instrument so sensitive that it will record a drop of wind pressure from eighty-five miles an hour to zero in one-hundred and twentieth of a second, is announced.

An Eskimo who had never visited civilization before saw his first movie and became insane. We think we've seen the same movie.

Will Use Alberta Coal

To Receive Share Of Relief Coal Orders From Saskatchewan

Alberta domestic coal operators will receive a proportionate share of relief coal orders from Saskatchewan, according to C. G. Durham, secretary of the Alberta Domestic Coal Operators' Association. Alberta mines will supply one ton in four for eastern Saskatchewan, he said, receiving practically all the orders for the western part of the province. Orders, it is believed, will reach 250,000 tons.

Persian Balm—there is nothing like it for creating and preserving a lovely complexion. Cooling, caressing—it soothes and dispels all roughness or chafe caused by weather conditions. Delicately fragrant, it adds exquisite charm to the most finished appearance. Dainty women inevitably choose Persian Balm. A velvety smooth lotion, it makes the skin rose-leaf in texture. Recommended also to soften and whiten the hands. Truly a peerless toilet requisite for every woman.

A little boy once gave a definition of friendship: A person who knows us and still likes us. He might have added: and who lets us alone and doesn't interfere in our private affairs and doesn't come to see us too often.

A lot of folk think that begging is an easy way of getting a living, but we'd like to see them try it for a couple of weeks. We have yet to envy a beggar.

Richness Of Mineral Fields In Great Bear Lake Area Are Stated To Exceed Cobalt

Confirmation of the sensational richness of the mineral finds on Great Bear Lake was given by Robert J. Jowsey, prominent Toronto mining man and prominent in the Sherritt-Gordon Corporation, who recently returned by aeroplane from the north.

Although reticent, Mr. Jowsey admitted that he had "never before seen such an abundance of mineral stains in one area in a lifetime of mining."

Mr. Jowsey, who was one of the pioneers in Cobalt, declared that owing to the entire country being composed of high ridges in which the mineral lies, mining will be comparatively simple.

"Where it cost \$80,000 to get a plant going in the Cobalt, one with four times the capacity can be set up on Great Bear Lake for \$8,000 to \$10,000."

Discussing the question of production and smelting, Mr. Jowsey expressed the view that there would be no difficulty in smelting the silver ore when it is mined. The proximity of oil at Fort Norman will greatly assist the Great Bear development, Mr. Jowsey believes.

"In all my experience in mining, and I've had plenty years of it, never have I seen anything to compare with Great Bear," said Mr. Jowsey. "The copper vein is, I think, the largest and richest in the world. Some of the silver lodes are so rich and virgin that they can be shipped to the smelter and melted to bar silver without any refining," said Mr. Jowsey.

In the present instance Mr. Jowsey is not acting for the Sherritt-Gordon, but went into Bear Lake independently.

He proposes to do development work this winter and will send in gangs of men to Great Bear to probe the seven claims he staked on this trip.

"I should estimate," he said, "that there are close to 2,100 claims staked already and every day sees 'planes loaded with prospectors arriving to stake. I hope that I threw my stakes into a couple of million dollars worth of silver, but I can't tell yet," was his smiling statement. He did, however, say that Ventures, Dominion Explorers, Sherritt-Gordon, Manitoba Basin, N.A.M.E. and Consolidated Smelters and Miners had sunk a few holes and on the strength of the findings were each leaving men on the claims for development during the winter.

Questioned on the radium situation, he said: "I saw a lot of stuff which they said was radium, but whether it was worth a million a ton or \$3 a ton I couldn't tell. I don't know radium."

"But I do know copper and silver and what I saw showed me that at Great Bear is the largest and richest run of pay-ore veins in the world. Even if the radium only pans out to a dollar a ton, millions will be made from the copper and silver. So abundant is it that it sticks out of the rock on the lake shore and extends back into the coppermine area."

According to information there are only three mining camps established so far. LaBine has one at Hunter and Echo Bay each, while the Dominion Explorers have one at Glacier Bay.

"Right now," he said, "only the large eastern mining concerns realize the untold wealth of the area. The general public does not seem to know just how heavily the land is mineralized. It will be a repetition of the affair at Cobalt in 1904 when lands there were sold for a song to the mining corporations. Great Bear will make the Cobalt field look like a piker."

"If you go into the cage again and make the lion wild, I will set the dog on you."—Musketeer, Vienna.

W. N. II. 1928

Lure Of the North

Many Applications For Permission To Locate At Churchill

The lure of the north is strong in the hearts of Canadians. Anyone doubting this should see the correspondence piling in on officials of the Hudson Bay Railway and the Manitoba Government asking permission to go to the new port of Churchill, which has not been opened yet to the public. Everyone seems to want to go north. The requests come from commercial interests desiring to be early on the scene, and from the great mass of individuals that wish to grow up with the port. Many desire to go in this fall to establish a business and be ready to open their doors in the spring. Hotel applications by the dozen, clothing stores, dozens of different kinds of stores, all these are clamoring for the provincial government to let them in on the "ground floor" at Churchill.

It is learned officially, however, that Churchill will not be opened to the public until next summer at the earliest, although the laying out of the townsite is completed.

There is a considerable programme of work to be done at Churchill next summer before the port will be completed, although construction work on the elevator is finished.

Bacon Cannot Be Frozen For Export

But Scientists Have Found Way To Overcome Difficulty

Bacon cannot be successfully frozen for export. But British scientists have proved that pork can be frozen and then mild-cured into bacon on arrival in the United Kingdom. Frozen pork from New Zealand was defrosted at Cambridge and made into bacon. Then it was sent to a number of bacon experts for comparison with the best Danish and English sides. The experts rated it superior to Danish and only slightly inferior to the highest quality English bacon. This work is part of a scheme for research into the best methods of transporting and storing Empire meat financed by the Empire Marketing Board.

The Infallible Test

The chorus-girl was giving notice that the company would have to dispense with her services owing to her approaching marriage. "Pretty sudden, isn't it?" growled the manager. "It was, in a way," agreed the girl. "I only met him a short time ago, and at first I wasn't sure of my feelings. But the moment I saw his Rolls-Royce yesterday I knew I loved him."

A man's temper improves the more he doesn't use it.

National Wealth Of Canada According To Latest Estimates Is Placed At High Figure

Just Like Human Beings

Among Millions Of Hens No Two Alike Says Expert Poultryman

To most persons a chicken is just a chicken minus any characteristics which distinguish it from any other chicken, aside from the obvious differences in breeds. But to E. C. Foreman of Lowell, Michigan, each chicken is an individual. In fact, he says a hen has a social consciousness, a cosmic urge, and can be just as temperamental as the female of the human species.

For six years he was in charge of the poultry department of Michigan State College and then served as head of the poultry department for two years. Six years ago he came to Lowell and started a poultry farm.

"Every hen," according to Mr. Foreman, "has just as many characteristics as a human being. Among all the millions of hens in the world no two are alike."

"Chickens," he continues, "fall into three classifications. Out of every hundred approximately 10 are supers, 60 are mediocre and 30 are culls. That, I think, is about the same percentage as among human beings. The 10 per cent. has beauty and character and intelligence. It is keen and alert and aggressive."

Manitoba Community Farm

Plans For Providing Employment For 1,000 Persons Are Under way

Plans for a community farm employing eventually 1,000 persons were advanced in Winnipeg when it was announced that a five-year lease of the 2,000-acre Manitoba Government Farm, 76 miles northeast of Winnipeg, would likely be granted.

The Imperial Immigration League of Manitoba, negotiating with the Provincial Government for the lease, purposes to convert the farm into a self-sustaining community where married men and their families will have the opportunity of making a living. Fifty families, preferably from Winnipeg, will be given immediate employment there. The scheme is designed to relieve unemployment and the city council will be requested to co-operate by allowing \$350 to each man.

Aeroplane passenger service will be established in China from Shanghai to the Siberian border, where it will connect with a Soviet service to Europe.

The national wealth of Canada, in 1929 was, exclusive of undeveloped natural resources, approximately \$30,840,000,000, which is an increase of \$1,210,000,000 over the 1928 estimate of \$29,630,000,000, according to the Dominion Bureau of Statistics. Similar estimates placed the total for 1921 at \$22,195,000,000 and for 1925 at \$25,673,000,000 though these figures are not exactly comparable in view of certain improvements and additions that have been made in the method of estimation. In the present report is included for the first time an estimate of the wealth in harbours, aircraft and highways.

As regards the provincial distribution of wealth, Ontario ranked first with estimated aggregate wealth of \$10,628,000,000 or 34.46 per cent. of the total; Quebec second, with \$8,265,000,000 or 26.8 per cent.; Saskatchewan third, with \$3,047,000,000 or 9.88 per cent.; and British Columbia fourth, with \$2,644,000,000 or 8.57 per cent. of the whole. The other provinces ranked as follows: Alberta, \$2,406,000,000; Manitoba, \$1,970,000,000; Nova Scotia, \$911,000,000; New Brunswick, \$788,000,000; Prince Edward Island, \$164,000,000.

While Ontario and Quebec led in absolute wealth, the western provinces came first in per capita wealth. British Columbia held first rank with a per capita wealth of \$4,474; Alberta second, with \$3,724; and Saskatchewan third, with \$3,516. Ontario with a per capita wealth of \$3,249 was fourth, Quebec was fifth with \$3,072, and Manitoba sixth, with \$2,970.

Urban real property amounting to \$8,251,011,000 or 26.75 per cent. of the total, constituted the largest item in our national wealth.

The total agricultural wealth, which in 1928 was \$8,052,521,000 declined to \$7,939,477,000 or 25.74 per cent. This amount includes the value of agricultural production in 1929 or \$1,631,124,000 to cover the average stocks of agricultural goods in the possession of farmers and traders and the amount invested in preparation for the new crop.

Result Of Wheat Test

Shows Protein Content Of Manitoba Crops Higher This Year

Dr. F. J. Birchard of the research laboratory of the Canadian Board of Grain Commissioners, in a test made for protein content in the wheat crop of Manitoba, shows that the wheat crop of the province has a maximum of 18.3 per cent. as against a maximum of 14.5 per cent. last year and a minimum of 10.2 per cent. this year as compared with 8.4 per cent. last; the average being 12.25 per cent. against 11.5 per cent. in 1930. The test grains were taken from the same districts as last year.

Suited Him Fine

A colored minister of a Baptist church, so runs the story, in order to strengthen and confirm the faith of his congregation, took as his text: "In those days came John the Baptist, preaching in the wilderness of Judea."

"Oh," said he, "how I like to read these precious words in the blessed Bible! You don't read anywhere about John the Presbyterian, or John the Episcopalian. No, brethren, it is John the Baptist."

Mechanical food service which was installed by a small restaurant in London has not proved popular.

"What! 15 shillings for that simple meal! Are chickens so scarce?"

"No, but customers are."—Hummel, Hamburg.

BRITISH SCHNEIDER CUP PILOTS RACE AGAINST EACH OTHER

Flight Lieutenant G. H. Stainforth set a new world's speed record of 386.1 miles an hour in a seaplane over a three-kilometer course at Calshot, England.

Great Britain also won permanent possession of the Schneider cup when Flight Lieutenant J. N. Boothman flew another seaplane 217 miles at an average speed of 340.08 miles an hour over a 31-mile course.

While Lieutenant Stainforth's speed remained to be checked and verified by the International Aeronautical Federation, it officially was announced that he had beaten by more than 28 miles an hour the previous world's speed record of 357.7 miles an hour, set by Squadron Leader A. H. Orlebar, in 1929.

Lieutenant Stainforth's speed over the second of four laps was 404.265 miles an hour. This new record for the distance verified predictions that a British 'plane would pass the 400 mark.

With the performance of Lieut. Boothman, Great Britain took the Schneider trophy permanently, having won the two previous Schneider cup races. The cup was presented by the late Jacques Schneider, French sportsman, for international competition. Inset are four of the five daredevils who participated in the race. Top, left and right: Squadron Leader Orlebar, previous holder of the world's record, 357 miles per hour; and Flight-Lieut. Stainforth. Below, left and right: Flight-Lieut. Long, and Flight-Lieut. Boothman.

Unique Scheme To Prevent Fire Loss In Saskatchewan

Hon. J. F. Bryant, K.C., Announces
Details Of Province-Wide School
Competition To Promote Fire
Prevention

Saskatchewan has adopted a unique method of disseminating fire prevention education, which is designed to carry the message of "caution" into every home in the province, using the school children as the means to the end.

Unique in conception and as a method of propaganda, the scheme also is unique in that no other province has anticipated it, and Saskatchewan can claim it as its own.

Author and sponsor of the scheme is Hon. J. F. Bryant, K.C., Minister of Public Works and Minister of Telephones in the Saskatchewan Government. Mr. Bryant also is Minister in charge of the Insurance and Fire Prevention Department of the Government, and it was while acting in this capacity that he realized the necessity of instituting a vigorous campaign for reduction of fire loss and fire insurance premiums by the elimination of palpable fire hazards from the homes.

Central feature of the scheme is a sectional view of a typical Saskatchewan residence, showing, in graphic fashion, some 61 of the commoner causes of preventable fires. Vivid type directs attention to the various hazards depicted, and a casual survey will reveal many such hazards in even the best of homes.

Copies of this picture or "hazard chart" are being forwarded to every school in the province for distribution among the children attending school, and it is proposed that the teachers will utilize the chart in teaching fire prevention, composition and drawing. The children are expected to take the chart home, discuss the subject-matter with their parents, search out similar hazards in their own homes and take steps to remedy any dangerous condition found to exist. And there's something in it for the children too!

Realizing that some special incentive is required to arrest the attention and grip the imagination of the children so that interest may be transmuted into action, Hon. Mr. Bryant conceived the idea of a province-wide competition which, starting among the children attending a school would widen out to embrace the inspectorate and, after that, the whole province. The competition bespeaks the co-operation of the children, the parents and the teachers, will represent definite accomplishment in the removal of fire hazards, and undoubtedly will do much to eliminate carelessness and sheer indifference to dangerous conditions from which the majority of fires originate.

The nature and objects of the competition, told in Mr. Bryant's own words, follow:

Hon. J. F. Bryant, K.C., Minister of Public Works and Minister of Telephones in the Saskatchewan Government.

"Copies of the picture will be sent to each school in the province in quantities sufficient for distribution among all the pupils attending the school. The teacher is expected to use the chart in giving instruction in fire prevention, and in teaching composition and drawing. The pupil, in turn, is expected to take the chart home, discuss it with his or her parents, and then take steps to remove any fire hazards that may be found in the home.

"The children then will fill out a questionnaire, which is being prepared by the Fire Prevention Department of the Government, and will write a composition on 'Fire Hazards in Our Home and what I have done to remove them.' The composition and questionnaire will be marked by the teacher for neatness, accuracy and originality, and to the pupil obtaining the highest standing in the school a gift copy of some well-known and popular book will be awarded. This year, the book selected is 'Lorna Doone,' R. D. Blackmore's famous novel. The teacher will then send the winning composition and questionnaire to the inspector for the district who, assisted by a committee of teachers, will select the best in the inspectorate. The pupil declared the winner in this stage of the competition will be awarded a cash prize of \$5, and the pupil placing second will receive \$3. The winning questionnaire and composition in the inspectorate then will be forwarded to the Department of Education, Regina, where each will be carefully scrutinized and marked, and the pupil adjudged to have turned in the most meritorious performance in the province will be given choice of a shetland pony or a bicycle.

"In this way, it is hoped that the gospel of fire prevention will reach every home in Saskatchewan and that the result will be a marked decline in the annual fire loss and a consequent drop in fire insurance premiums in this province."

Inspiration for his scheme was found by Mr. Bryant, in statistics relative to Saskatchewan's 1930 fire loss. These reveal that, during 1930, Saskatchewan's fire loss aggregated \$3,504,293, which works out at \$4.04 per head of population. The number of fires recorded totalled 2,558—an average of seven fires a day throughout the year!

Canadian fire losses during the year reached the huge total of \$46,109,875 and, conjoined with this, fire took an appalling toll of human life, 237 persons meeting their deaths through fire in Canada, in 1930. In Saskatchewan, itself, 54 persons have lost their lives through fire in the last six years, while some 119 persons suffered serious injury as result of fires. The most regrettable feature of this human and material waste is that the majority of the fires reported were preventable, being the result of carelessness or of reckless disregard of obviously dangerous conditions.

An average of three dwellings, a store and a barn were destroyed daily by fire in Saskatchewan during the year 1930, according to statistical records in the Fire Prevention Department of the Government. These records indicate that, during the year, 1,093 dwellings, 348 barns and granaries, and 348 stores were razed by fire, the toll of the fire fiend being augmented by 33 garages, 31 elevators, 30 hotels, 28 schools, 14 theatres, eight pool rooms, and eight churches.

That carelessness and indifference to consequences were contributory factors to the severe losses suffered is revealed by the tabulation of definitely ascertained causes, which indicates that 230 of the fires reported were caused by careless smokers, 196 by overheated stove pipes, 157 by defective chimneys, 142 by careless handling of gasoline, 50 by children playing with matches, 70 by defective wiring, 72 by lightning, and 29 by spontaneous combustion. Seven per cent. of the fires investigated were of suspected incendiary origin.

Hon. Mr. Bryant found additional inspiration for his campaign to spread fire prevention education in the province, in the fact that, during 1931, fire losses for the first six or seven months are considerably in excess of those reported for the corresponding period of 1930. This applies not only to Saskatchewan, but to Canada as a whole. The estimated fire loss in Canada from January 1 to July 31, 1931, is \$26,344,400, an increase of \$10,719,885 over the loss suffered in the corresponding period of last year. Saskatchewan contributed to this increase, for the records show the estimated loss in this province during the six-month period, January 1 to June 30, as \$2,311,261, which compared with \$1,918,157 for the corresponding period of 1930, is an increase of \$393,104. This loss was suffered in 1,320 fires, of which 586 were dwellings, 231 stores, and 262 barns.

Will Be Customs Officer

Vancouver Man Will Have Charge Of Customs and Excise At Churchill

The honour of being first customs and excise officer of the new port of Churchill will belong to T. Ross Moulton, of Vancouver, B.C.

Mr. Moulton will have charge of the entering and clearing of vessels from the port during the despatch of wheat from Canada's new grain port.

Churchill will not be the first port this veteran customs officer has opened, as he was in charge of the Yukon in its palmy days. He has been in the service for more than 30 years.

Quick action saves trouble, worry. Keep Douglas' Egyptian Liniment always handy. Stops bleeding instantly. Cauterizes wounds. Quickly relieves Barber's Itch and Ringworm.

Light travels about a million times faster than sound, and therefore we see the lightning before we hear the thunder; both, of course, are actually simultaneous.

Prairie Manufacturing

Manitoba Continues To Lead Other Prairie Provinces In Output

Manufacturing plants in the Prairie Provinces in 1929 turned out goods with a gross value of \$352,967,078. There were 2,501 such establishments. Manitoba continued to lead with products valued at \$164,909,127; followed by Alberta with \$107,556,792 and Saskatchewan with \$80,501,159.

for RHEUMATISM
Pour Minard's into a warm dish. Rub liniment gently in; then apply it according to directions. . . and soon you'll get relief!

MINARD'S
"KING OF PAIN"
LINIMENT

The capital investment in the industries totalled \$339,678,100 and the number of employees was given as 48,113.

The Oil For the Farmer.—A bottle of Dr. Thomas' Electric Oil in the farm house will save many a journey for the doctor. It is not only good for the children when taken with colds and croup, and for the mature who suffer from pains and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the house.

New Stamping Machine

The Daily Mail recently announced a new stamping and pressure machine which, it said, would "revolutionize British industry." The Mail said the machine could be used in stampings of every sort, from watch mechanisms to motor car bodies, and for making nails, bricks and composition materials.

A new strain of popcorn has been produced which pops corn to a surprising size.

SHE HAD TO CRAWL TO BED

One stair at a time—on her hands and knees—that was how she had to do it. And when she did get to bed, her troubles were not over.

"Twelve months ago I could not sleep on account of the terrible pains in my knees, and I might say in all my joints. At night I could only crawl up to bed, one stair at a time. But since taking Kruschen Salts regularly, I have entirely lost all pains and stiffness, and, if needed, could now run upstairs two at a time. In fact, I feel 10 years younger. I shall never be without Kruschen Salts."—Mrs. A. E. D.

Do you realise what causes rheumatism? Nothing but sharp-edged uric acid crystals which form as the result of sluggish eliminating organs. Kruschen Salts can always be counted upon to clear those painful crystals from the system. The six salts in Kruschen are bound to dissolve away all traces of uric acid. And more! They ensure such perfect internal regularity that no such body poisons as uric acid are ever able to accumulate again. Prove this for yourself by buying a bottle of Kruschen.

SUNDAY SCHOOL LESSON SEPTEMBER 27

THE SPREAD OF CHRISTIANITY IN ASIA

Golden Text: "They rehearsed all things that God had done with them, and that He had opened a door of faith unto the Gentiles."—Acts 14:27.
Devotional Reading: Matthew 13:31-33.

Review By Means Of Allusions

Recall the story to which these statements refer:

Let us so live that others may take knowledge of us that we have been with Jesus.

We are in danger of obeying man rather than God, of thinking more about what others will say than about how God will judge.

"O little ship that rocked the wave
Bound for the Cyprian shore,
Rare hostage to the world you gave
In him whose life you bore."

When men refuse to retain God in their knowledge, they can hardly expect to be secure from the temptation to bow before creatures of like passions with themselves, whether they be cunning adventurers or heartless tyrants.—The Christian.

We are daily judging ourselves unworthy of divine grace in every act of refusal to accept and rely on it.—Lyman Abbott.

The world has often had its dreams of gods who had come down in the likeness of men, and even of a divine influence pervading all things; but no ethnic religion has told how men may come to God.—H. E. Fox.

"The talk of Lenin was overbearing and belligerent as he breathed out threatenings and slaughter on the road to Genoa."

St. Stephen did not get the bishop's pay for that long sermon of his to the Pharisees.—Ruskin.

All souls that struggle and aspire.
All hearts of prayer by Thee are lit,
And dim, or clear, Thy tongues of fire
On dusky tribes and twilight countries sit.—Whittier.

"Japan has seen believers scatter abroad preaching the Word, and many with one accord giving heed to the things that were spoken."

"Hitherto Christianity had imagined that men could only approach it through the gate of the temple, but at Antioch it discovered that the gate of the temple was only one of a multitude of avenues."

I asked Benny in what part of the Scripture he had found an allusion to essays, and he at once explained that the man from Ethiopia was 'settin' in his carriage readin' essays.'—Annie Trumbull Slosson.

SURVEY IS MADE OF THE WEST'S NEW GRAIN PORT

Churchill, Man.—Built on the barren shore in Manitoba's north country, Churchill's ultra modern harbour development won the acclaim of an Ottawa delegation headed by Hon. R. J. Manion, Minister of Railways and Canals. Two other cabinet ministers, Hon. Robert Weir, Minister of Agriculture, and Hon. T. G. Murphy, Minister of the Interior, were in the party making a rapid-fire survey of the new grain port.

Confidence in the ability of Canada's farthest north grain harbour to handle any business which may develop via the bay route was expressed by Dr. Manion. Before leaving for the south he remarked that the mechanical portion of the port development had functioned perfectly on its initial test, leaving success of the route dependent only on the trend of trade.

Not a doubt was entertained by the minister but that the "Farnworth" and the "Warkworth," chartered by the Government to carry the inaugural bay route shipment overseas this month would reach their destinations successfully. He even considered that lower bay insurance rates on hulls and cargoes might be expected for next season as result of the two shipments of some 540,000 bushels of Saskatchewan wheat.

Canada's Government, Dr. Manion promised, would draw the attention of the Imperial shipping committee at London any successful journeys overseas through the Hudson Straits, in the endeavour to obtain the most equitable insurance rates possible. He stressed the fact that the government had undertaken to insure that rates on the test shipments from Churchill would not be higher than from the prairies via Montreal. Possibility that the Government might be called on to foot a bill for an extra cost by the bay route was indicated by Dr. Manion in view of current low rates on the Great Lakes due to lack of cargoes.

He pointed out that the Government had provided its harbour facilities for the trial shipments without cost, and would implement its promise to absorb the rate differential if any. The Government is earnestly endeavouring to do everything possible at Churchill, stated Dr. Manion, pointing to plans for freight sheds, raw grain galleries and other developments for next year.

The sheds are to be constructed on the pier next summer if the foundation of the pier has settled sufficiently to allow work to be done. By the time shipping opens on the bay next summer, the harbour will be ready to handle cattle, from the west's agrarian areas, the minister forecast. He mentioned that such a trade might necessitate the provision of cattle yards at The Pas 511 miles southward, but saw no difficulty in the way.

Coal and lumber handling facilities, he said, would be pressed forward to handle any trade which develops and the entire facilities would certainly be ready by 1933.

"The Government will promise nothing which cannot be fulfilled," said Dr. Manion, "lest the failure to implement an undertaking might react to the disadvantage of the port."

"Without John I. McFarland, head of the Canadian Wheat Pools' Central Selling Agency, the trial shipments this fall would have been impossible," commented the minister. No other offer of wheat for the bay route shipment had been made, he said, and even now the second cargo has not yet been sold. Dr. Manion announced that the shipment of No. 2 northern, trimmed down Wednesday, September 16, in the hold of the "Farnworth," had been sold by Mr. McFarland to Spillers, London, England.

Perfect synchronization of the work at Churchill by the various developing groups was named by the minister as the outstanding reason for the on-the-dot success of inaugural operations. He commended especially C. D. Howe, consulting engineer of Fort William, Ont., who designed the 2,500,000-bushel elevator which has taken rank as the world's fastest operating ocean terminal.

Only 20 talking pictures were produced in Italy in the last year.

W. N. U. 1908

Count Only Preliminary

Further Returns From Recent Census Subject To Correction

Ottawa, Ont.—A further statement of population in a number of cities and towns of Canada which were not dealt with in previous announcements, has been issued by the Dominion Bureau of Statistics. The statement covers more particularly a number of towns, although it deals also with two or three cities in different provinces.

The figures issued show that the city of Quebec, increased from 95,193 in 1921, to 129,103 in the present year. The population of Windsor, Ont., has advanced from 38,591 to 62,957 in the ten-year period.

In western Canada, the city of Regina reported an increase from 34,432 to 53,034.

The largest percentage increase recorded in the statement is in the town of Riverside, Ont., which increased its population from 1,155 in 1921 to 4,426 in the present year. This is an increase of 283 per cent.

It is made clear in the statement that the count is a preliminary one and that returns are subject to correction as additions on account of closed houses and absentees have yet to be made.

REDUCTIONS IN NAVAL PAY TO BE RE-EXAMINED

London, Eng.—After sharp exchanges over unrest in the Atlantic fleet during a turbulent question hour, the House of Commons wandered placidly through the emergency budget's proposals to increase the duties on beer and tobacco.

The Government had comfortable majorities on the two proposals—131 on the beer duties and 74 on the tobacco duties.

All the storm in the House was provoked by the brief statement of Sir Austen Chamberlain, first lord of the admiralty, to the effect the Board of Admiralty had agreed to re-examine the proposed reductions in naval pay and to consider any cases of alleged hardship. In view of this decision the vessels of the Atlantic fleet have been ordered to proceed to their home ports, he added.

Laborites immediately seized on this brief statement. There was a clamor from the opposition benches for immediate debate. The Government remained adamant. The opposition then put a motion that the House suspend the 11 o'clock closing rule, but the Government had a comfortable majority, to defeat it by 286 to 195 votes.

In an uproar of questions from the opposition and retorts from the Government benches, the Laborites asked if the unemployed whose benefits had been cut, would also be considered. They wanted to know if the soldiers and policemen would likewise be consulted about their reductions. They remarked on the fact that some of the naval rates of pay have been cut by 25 per cent. while the first lord of the admiralty and some other cabinet

REPRESENTS CANADA

C. A. Bowman, Editor of the Ottawa Citizen, who is one of the Canadian delegates to the fourth biennial meeting of the Institute of Pacific Relations to be held at Hangchow, China, in October.

ministers are taking a 10 per cent. cut.

Prime Minister Ramsay MacDonald replied to one of the opposition's many questions with the declaration that it had always been understood the Government departments making cuts in expenditures could adjust the burdens; a step that could be taken without materially affecting the budget estimates.

When the House returned to the emergency budget, D. G. Logan, Laborite, declared to the amusement of the House there was neither soul nor sympathy "in this damnable coalition." He challenged every member of the cabinet from the Prime Minister downwards, to do battle with him in his constituency of Scotland, Liverpool, the seat represented for so long by the late "Tay Pay" O'Connor, Irish Nationalist.

Wheat Quality Is High

Equal If Not Better Than Any Previous Year

Winnipeg, Man.—The milling and baking quality of Canada's new wheat crop is exceptionally high and is equal, if not better, than that of any year tested by the Dominion Grain Research Laboratory it was announced.

The weight per bushel of the samples received to date and which have just been examined under the direction of F. J. Birchard, are about the same as last year, with the yield of flour comparing favourably. The protein content is much higher than the previous crop, while the gluten of different grades also is exceptionally good.

The baking quality is excellent, the report says, and the flour absorption is higher and the loaf volume greater.

Superiority Of British Films

Toronto, Ont.—The increasing superiority of British motion pictures has led to the establishment in England of branch United States studios according to F. S. Royell, Canadian representative for British International pictures. "Hollywood is alarmed," he commended.

Proportional Vote Opposed

Manitoba Conservatives Object To Proposal Of Attorney-General

Winnipeg, Man.—Opposition to the principle of proportional representation contained in a suggestion by Hon. W. J. Major, Attorney-General, for a reduction in the number of seats in the Manitoba Legislature, was expressed on behalf of the Conservative party by Col. F. G. Taylor, leader of the group.

Col. Taylor said his party has no objection to the proposed reduction, but "will use every legislative means to prevent the extension of the suggested proportional representation system to the rural areas of the province."

Mr. Major's suggestion would reduce the number of seats from 55 to 35 and would apply proportional representation to the whole province with the exception of four single-member constituencies.

Gandhi Makes Appeal

Asks British Labour Party's Support In India's Struggle

London, Eng.—Mahatma Gandhi stalked into the "Mother of Parliaments" and pleaded for the British Labour Party's support in India's struggle for independence.

He had been invited to address Labour members of the House of Commons privately regarding India's claims.

He said his case was complete independence for India, the same as that enjoyed by Great Britain. He would accept no compromise, he said. Afterward he answered the questions of various Labour members.

Convict Taking Arts Course

University Work Sent To Youthful Long-Termers In Portsmouth Prison

Kingston, Ont.—For the first time in the history of Queen's University, a convict in Portsmouth penitentiary has made application to enter in arts course and do his studies extra-murally in prison. The applicant is a youthful long-terms. In the past five years he has passed all Ontario departmental examinations from entrance to high school. The university work will be sent to him by the head of the extra-mural department at Queen's.

Four Straight Records

Quebec, Que.—The Canadian Pacific liner "Empress of Britain," docking at Quebec, August 31, made its fourth straight record of the Atlantic journey, from land to land, in four days, nine hours and 23 minutes. This is the fastest time in which this stretch of water has been covered. The steamer carried nearly 1,000 passengers and 21 automobiles.

To Cut Fire Breaks

Victoria, B.C.—Work to the extent of 14,000 man-days will be created by the definite decision of the Provincial Government to proceed with the cutting of fire breaks and patrol lanes in six forest areas of the province. Approval to proceed with this scheme as part of the relief program of the province has been received from Ottawa.

MEASURES TAKEN FOR RELIEF WORK ARE OUTLINED

Ottawa, Ont.—A review of Canada's unemployment problem and an outline of the relief measures which are being taken by the Federal Government in co-operation with the provinces and municipalities is outlined in a statement issued by Hon. G. D. Robertson, Minister of Labour.

"Relief of the farmers in the drouth stricken areas of the prairie provinces constitutes the most difficult problem in western Canada, but this ought not to be confused with unemployment arising from industrial and commercial fluctuations."

"Some substantial projects in the urban centres have been tentatively approved, and the Minister of Agriculture (Hon. Robert Weir), is actively directing the farm relief programme in those areas, particularly in Saskatchewan, as well as assisting in the relief of unemployment in the cities and towns."

"In western Canada substantial park areas in Alberta offer opportunities for the creation of considerable useful work in delimiting park boundaries, clearing and building roads and opening up avenues of communication between park areas, of which Jasper and Banff are centres, as well as some similar works in parks located in Manitoba, Saskatchewan and British Columbia."

"The Provincial Government of Alberta has concluded an agreement with the Federal Government respecting both provincial and municipal undertakings in that province, and, like Ontario, it is expected that substantial relief will accrue to the larger urban centres by the withdrawal of transients and single men, who may be wisely assisted in the outside undertakings, both in parks and on provincial roads."

"The Province of British Columbia is suffering particularly because of the contraction in the lumbering and mining industries. Field crops in that province, as in the eastern provinces, have been quite satisfactory as to volume, but not so satisfactory as to sales prices obtainable."

"Manitoba has already commenced some highway construction work and a substantial programme of municipal projects will be submitted for approval shortly."

"There are many indications that the nation-wide depression is passing and that Canada may look forward with reasonable assurance that, as in every similar previous experience, she will emerge earlier than some other countries to a new era of progress."

"During the past week, however, the transportation situation seems to be improving and it may with reasonable confidence be expected that railway earnings will show better results during the next few weeks than they did in the month of August, owing to the fact that the crop movement is later this year than last year."

Radio Development

Col. Steel Appointed To Staff Of Research Council

Ottawa, Ont.—Lieut.-Col. W. A. Steel, M.C., who has directed the radio development of the Department of National Defence, has been appointed to the staff of the National Research Council, it is announced. Starting October 1, he will have charge of the council's radio research programme.

Colonel Steel has had a distinguished career in both military and radio fields, he has represented Canada at numerous international radio conferences and he accompanied Premier R. B. Bennett to the last Imperial Conference.

Radio research has been assigned a definite place in the plans of the National Research Laboratories, and many problems of a technical nature will be dealt with under the direction of Col. Steel.

Completing Plans For Bonus

Calgary, Alberta.—Arrangements for the payment of the five-cent Dominion Government bonus on wheat is nearing completion in Alberta. Office supplies and other equipment required in distributing the bonus have arrived at the Alberta wheat pool head office. They will be sent to pool elevator agents immediately, it was stated.

FAMOUS AIR GIANT TO BE SCRAPPED FOR ECONOMY'S SAKE

To the millions of Canadians who had the good fortune to witness the British air monarch, R-100, in flight over Eastern Canada following her Atlantic trip a year ago, the news that she is to be scrapped as part of the Motherland's "strict economy" plan, will be accepted with great regret. It seems a pity after spending more than \$2,000,000 in her construction, that the British Air Ministry have to make such a drastic move. Above are two familiar pictures, taken in Montreal, showing the giant dirigible anchored to the airship mast at St. Hubert, and a close-up of the cat-walk by which passengers and crew board the airship.

**GAME CONSERVATION TALK
LACKS REASONS**

The question of waterfowl con-
servation is before the public and many
are of the opinion that the only way
in which to conserve the game is to
close the season in Canada altogether
and the question will right itself. This,
however, is not fair to Canadian sports-
men and in our opinion would only
tend to decrease the waterfowl if Can-
adian provinces closed the season and
the United States did not take steps
to do likewise. Should waterfowl find
a restful place to spend the summer
and raise their young, and in the fall
live unmolested, they will do well in
this country. However, when the cold
weather sets in they leave for the
warmer climate to the south and there,
not being on the look out for danger,
will fall prey to the automatic shot-
guns of our neighbors across the In-
ternational Boundary. This is almost
sure to the case, for American
hunters outnumber Canadian hunters
about 20 to 1.

We believe that the cause as set out
by game officials in Southern Saskat-
chewan and Alberta, i.e., the shortage
of water causing extermination of a
great deal of our game, is very mis-
leading and that where drought has in-
tervened the game has gone north to
the water holes, lakes and rivers. True,
in some cases the young birds were
lost, but on the whole, although reports
stated that there were no ducks in the
southern part of the country, they are
more numerous in the north than ever
before. If these reports are correct,
and from actual experience, they seem
to be true, the cry of waterfowl ex-
termination is greatly exaggerated.
Why then, should we raise ducks in
Canada and forgoe the pleasure of
hunting them so that our Southern
friends can enjoy their favorite sport.

Unless the United States closes the
duck season altogether there is no
real reason for Canadian provinces to
further curtail their open season on

waterfowl. The bag limit has been cut
sufficient to save game and any other
amendments to change the present
open season would only be a boon to
the American hunters.

To sum up the whole matter: Do
not change the Game Act or seasons
until the United States' government
has made their change. We can then
co-operate, and only then.

A CREAMERY FOR CARBON

For a good many years the Village
of Carbon has been without a cream-
ery and patrons have had to ship their
product to distant points. By the time
it arrives at its destination the grade
of the cream is often cut down and
the farmer usually suffers. During
past years there has not been suffi-
cient business to warrant the estab-
lishing of a creamery here. However,
with the more general incline to mixed
farming most of the farmers are now
milking a few cows and considerable
cream is leaving the district. This be-
ing the case, isn't it about time that
the Carbon Board of Trade and farm
organizations got together and advo-
cated for a creamery in Carbon? An
investigation would no doubt follow
and we would not be long in knowing
if there was sufficient cream being
shipped from Carbon and surrounding
districts to warrant the establishing
of a creamery here. Many towns much
smaller than Carbon have creameries
and are making them pay. Could we
not do the same?

A creamery is a great asset to a
town. It is a manufacturing and a dis-
tributing plant and saves the farmer
dollars in freight and express charges
annually. It employs local labor and
draws the farmers to town. With
ample creamery facilities our farmers
will go into mixed farming more ex-
tensively and cream cheques will be
common currency.

The time is now ripe for action. Co-
operation between the farm organiza-
tions and the Carbon Board of Trade
will do wonders—but hesitation in the
matter is only meaning lost dollars to
the community.

DON'T ATTEMPT TO BE PRINTERS

Don't attempt to be printers. It does
not pay you in the end. Instead, have
your local poster and other printing
done at The Chronicle Office. We will
quote you a reasonable price on all
work. Not only this—if you are put-
ting on an entertainment, etc. and
have your printing done here, you get
access to our free reader space in this
newspaper, which is worth more to
you than the paltry sum you spend
for other forms of advertising.

Don't pass up your local printing
establishment when you have printing
to do. Your patronage only will keep
a newspaper in Carbon.

Remember! When the next print-
ing salesman walks into your office
and asks you for a printing order, tell
him that there is a printer in town and
that he CAN do that particular job.

THE HOUSE OF DREAMS-COME-TRUE

— BY —
MARGARET PEDLER

Author of
"The Splendid Folly," "The Hermit
Of Far End,"
Hodder & Stoughton, Ltd., London.

CHAPTER I.—Continued.

The birth of Jean, two years after their marriage, had been frankly regarded by both of them as an inconvenience. It interrupted their idyll. They were so essentially lovers that no third—not even a third born of love's consummation—could be other than superfluous.

They had proceeded to shift the new responsibility with characteristic lightheartedness. A small army of nursemaids and governesses was engaged, and later, when Jean was old enough, she was despatched to one of the best Continental schools, whilst her parents continued their customary happy-go-lucky existence uninterrupted. During the holidays she shared their wanderings, and Egypt and the southern coast of Europe became familiar places to her.

At the age of seventeen, Jean came home to live at Beirnfels, thenceforward regarding her unpractical parents with a species of kindly tolerance and amusement. The three of them had lived quite happily together, though Jean had remained always the odd man out; but she accepted the fact with a certain humorous philosophy which robbed it of half its sting. Then, two years later, Jacqueline had developed rapid consumption, and though Glyn hurried her away to Montavan, in the Swiss Alps, there had been no combating the disease, and the romance of a great love had closed down suddenly into the grey shadows of death.

Peterson had been like a man de-

mented. For a time he had disappeared, and no one ever knew, either then or later, how he had first faced the grim tragedy which had overtaken him.

Jean had patiently awaited his return to Beirnfels. When at last he came, he told her that it was the most beautiful thing which could have happened—that Jacqueline should have died in the zenith of their love.

"We never knew the downward swing of the pendulum," he explained. "And when we meet again it will be as young lovers who have never grown tired. I shall always remember Jacqueline as still perfectly beautiful—never insulted by old age. And when she thinks of me—well, I'm still a 'personable' fellow, as they say—"

"My dear Glyn, you're still a boy! You've never grown up," Jean made answer.

She had been amazed—although in a sense relieved—to find how swiftly he had rallied. It seemed almost as though his intense loathing of the onset of old age and decay, of that slow cooling of passion and gradual decline of faculties which age inevitably brings, had served to reconcile him to the loss of the woman he had worshipped whilst yet there had been no dimming of her physical perfection, no blunting of the fine edge of their love.

It was easily comprehensible that to two such temperamental, joy-loving beings as Glyn and Jacqueline, England, with her neutral-tinted skies and strictness of convention, had made little appeal, and Jean could with difficulty harmonise the suddenly projected visit to England with her knowledge of her father's idiosyncrasies.

It was just possible, of course, since all which had meant happiness to him lay buried in a little mountain cemetery in Switzerland, that it no longer mattered to Peterson where he sojourned. One place might be as good—or as bad—as another.

Rather diffidently Jean voiced her doubts, recalling him from the reverie into which he had fallen.

"I go to England?" he exclaimed. "God forbid! No, you would go without me."

"Without you?"

Peterson sprang up and began pacing restlessly to and fro.

"Yes, without me. I'm going away. I—I can't stay here any longer. I've tried, Jean, for your sake"—he looked across at her with a kind of appeal in his eyes—"but I can't stand it. I must move on—get away somewhere by myself. Beirnfels—without her!"

He broke off abruptly and stood still, staring down into the heart of the fire. Then he added in a wrong voice:

"It will be a year ago . . . tomorrow."

Jean was silent. Never before had he let her see the raw wound in his soul. Lately she had divined a growing restlessness in him, sensed the return of the wander-fever which sometimes obsessed him, but she had not realized that it was pain—sheer, intolerable pain—which was this time driving him forth from the place that had held his happiness.

He had appeared so little changed after Jacqueline's death, so much the wayward, essentially lovable and unpractical creature of former times, still able to find supreme delight in a sunset, or an exquisite picture, or a wild ride across the purple hills, that Jean had sometimes marvelled how easily he seemed able to forget.

And, after all, he had not forgotten—had never been able to forget! The gay, debonair side which he had shown the world—that same rather selfish, beauty-loving, charming personality she had always known—had been only a shell, a husk hiding a hurt that had never healed—that never would find healing in this world.

Jean felt herself submerged beneath a wave of self-reproach that she could have thus crudely accepted Glyn's attitude at its face value. But it was useless to give expression to her penitence. She could find no words that might not wound, and while she was still dully trying to readjust her mind to this new aspect of things, her father's voice broke across her thoughts so smooth, polished, with just its usual inflection of whimsical amusement, rather as though the world were a good sort of joke in which he found himself constrained to take part.

"I've made the most paternal arrangements for your welfare in my

absence, Jean. I want to discuss them with you. You see, I couldn't take you with me—I don't know in the least where I'm going or where I shall fetch up. That's the charm of it"—his face kindling. "And it wouldn't be right or proper for me to drag a young woman of your age—and attractions—half over the world with me."

By which Jean, not in the least deceived by his air of conscious rectitude, comprehended that he didn't want to be bothered with her. He was bidding for freedom, untrammelled by any petticoats.

"So I've written to my old pal, Lady Anne Brennan," pursued Peterson, "asking if you may stay with her for a little. You would have a delightful time. She was quite the most charming woman I knew in England."

"That must be rather more than twenty years ago," observed Jean drily. "She may have altered a good deal."

Peterson frowned. He hated to have objections raised to any plan that particularly appealed to him.

"Rubbish! Why should she change? Anne was not the sort of woman to change."

Jean was perfectly aware that her father hadn't the least wish to "discuss" his proposals with her, as he had said. What he really wanted was to tell her about them and for her to approve and endorse them with enthusiasm—which is more or less what a man usually wants when he suggests discussing plans with his woman-kind.

So now, recognizing that he had all his arrangements cut and dried, Jean philosophically accepted the fact and prepared to fall in with them.

"And has Lady Anne signified her readiness to take me in for an indefinite period?" she enquired.

"I haven't had her answer yet. But I have no doubt at all what form it will take. It will be a splendid opportunity for you, altogether. You know, Jean"—pictorially—"you ought really to see the 'stately homes of England.' Why, they're—they're your birthright!"

Jean reflected humorously that this point of view had only occurred to him now that it chanced to coincide so admirably with his own wishes. Hitherto the "stately homes of England" had been relegated to a quite unimportant position in the background and Jean's attention focussed more directly upon the unpleasing vagaries of the British climate.

"I should like to go to England," was all she said.

Peterson smiled at her radiantly—the smile of a child who has got its own way with much less difficulty than it had anticipated.

"You shall go," he promised her. "You'll adore Staple. It's quite a typical old English manor—lawns and terraces all complete, even down to the last detail of a yew hedge."

(To Be Continued).

Public Utilities For Flin Flon

Manitoba Government Turning Town Over To Holding Company

Arrangements are being made by the Manitoba Government to turn the town of Flin Flon, in the northwest mining district, over to a holding company. This is to be done to provide the settlement with public utilities financed through the sale of lots. It is expected that waterworks, sewage and heating systems will result. The holding company will be known as the Flin Flon Townsite Development Company, and will be organized by the mining firm operating at Flin Flon.

Doubtless it's true that poverty isn't a crime, but if you're guilty of poverty, you always suffer for it.

The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

WHAT CAME BEFORE? Captain Jimmy is forced down in his plane on a desert island, while flying from China to Japan. Night after night he builds a fire in hope of attracting a passing ship. Then one evening he hears a steamer whistle in the darkness.

Night can't last forever. Gradually a faint light showed in the East. There we sat, all huddled around the fire—waiting. A dozen times I thought I made out a ship—only to find out that it was my imagination. Then came excited yell from Chung.

"Looker, looker, huge boat!" There, sure enough, was a good sized steamer, anchored several miles from shore. Just about sun up, a boat put off and a little while later it was beached about where we landed our plane.

The Captain, whose name was Bueno, had seen the faint glare of our fire and decided to stand by and investigate in the morning. The crew were all Filipinos and spoke not a word of English. I explained to him that we must take the plane apart and bring it with us, and after a while he dismantled it and carried it aboard. General Lu had come with the first boat to the ship, from which he refused to budge but Chung stayed with Scottie and me and went in the last boat.

"Chung," I said when leaving, "What shall we call that island of ours?" Chung gave it a scornful look. "Call him EGG," and so "EGG" we called it, which after all was appropriate, for it was nearly egg-shaped.

The freighter was bound for Karatsu, Japan, to pick up a load of coal. At Karatsu, we took advantage of the opportunity to rig up some pontoons for our plane, the "Eagle." Our last trip had proved the danger of flying over the sea

in a ship which could not alight on the water. We also rigged up a derrick and sling, so we could launch our plane very quickly over the side of a ship. Though we little dreamed it at the time, we were going to need a sea-plane soon enough.

The very first evening out of Karatsu as the sea grew hazy and dark, a group of us stood on the bridge of the "Madrigal," peering by turns through a telescope at a vessel which lay on the rim of the horizon. Now and then we could see faint flashes as though a small gun were being fired.

Through the glass we could make out the ship, as a small steamer, while dead ahead of it and partly hidden from us was a second boat that we couldn't see clearly.

The Captain was intently examining the strange ship through the telescope when Chung rudely interrupted. "Chung looker through longer stick," he announced.

"That China boy was all a quiver to get the glass into his hands. Never had he seen one before, let alone hold one, and he was all excited. With one hand he held the eye piece to his eye and grasped the other end of the telescope firmly. The very next minute there was an exclamation of surprise and dismay and there stood Chung with the telescope all collapsed (chuckle). He had pushed the two ends together and instead of a telescope about two or three feet long he held in his hands one that was only about eight or nine inches long. (chuckle). You should have seen the surprised expression on his face."

NOTE:—Any of our young readers writing to "Captain Jimmy," 2010 Star Building, Toronto, will receive his signed photo free.

—A silver tea in aid of the Anglican Church will be held at the home of Mrs. Braisher on Saturday, September 26th, from 4 p.m. to 6 p.m. and from 7 p.m. to 10 p.m. Men and ladies welcome.

Next Sunday, September 27th, is Rally Day and a combined service of the church and Sunday school will be held in the Carbon United Church at 11 a.m. The service will be mainly conducted by the Sunday school.

Miss Katie Neher was working in the Carbon Trading Company store for a few days last week.

Gordon Ramsay left on Monday for Edmonton to attend the Alberta University, at which institution he will study Pharmacy.

Wilfred Poxon has taken a position in the local drug store, and commenced his duties on Monday of this week.

Mr. and Mrs. Kenny of Calgary spent the week end visiting at the home of Mr. and Mrs. Geo. Oliphant.

The local mines have been fairly busy the past week or more and quite a few cars of coal is leaving town each day. Local trade, however, is reported to be slow.

Mrs. J. Atkinson, Jack and Norah motored to Calgary on Saturday for Mr. Atkinson, who has been attending the sittings of the Court of the Exchequer.

Miss Della Hoffort of Calgary arrived this week and is spending a few days visiting with her brother-in-law and sister, Mr. and Mrs. J. Rochester.

As a result of efforts of all parties concerned, F. Graham, resident engineer, of the Department of Public Works, Calgary, who has charge of road and other works in the Drumheller Improvement district, was authorized to supervise relief undertakings. Oscar Grieve, Carbon municipal councillor, was appointed in direct charge of the work.—Calgary Albertan.

The weather has again turned fine, although cold north winds have been prevalent.

C. W. Gray was a Calgary visitor on Sunday and returned the same day.

The next picture to be shown at the Carbon Theatre will be the all-talking drama "Officer O'Brian." This will be shown on Monday evening, September 28th.
